Profile:

Front-end Developer +3 Years experience in designing and developing front-end layouts, delivering high quality with high and clean code.

Professional skills:

Frameworks & Libraries:

- React.js
- Next.js
- jQuery
- REACT QUERY
- REACT-DATE-RANGE
- NEXT AUTH
- NEXT SEO
- REDUX
- REACT-ICONS
- REACT-TOASTIFY
- TOOLKIT
- MANTINE UI
- NEXT / Server

Languages:

- JavaScript
- Typescript

Web Technologies:

- HTML & HTML5
- CSS & CSS3
- SASS & SCSS
- Tailwind CSS
- Bootstrap

API & Data Handling:

- API
- JSON
- Prisma & Drizzle
- PostgreSQL

Tools & Platforms:

- Git & GitHub
- Azure

Concepts:

- Object-Oriented Programming (OOP)
- Algorithms Analysis

Professional Experience

Chefalarab

Front-end Developer, 2026

Project:

- **Chefalarab (Arabic Recipe & Food Platform):** A modern web platform providing 1,000+ Arabic recipes with categorized cuisines, recipe search, nutritional information, FAQs, cooking tips, and SEO-optimized recipe pages. Focused on delivering a fast, responsive, and user-friendly experience.

Responsibilities and Key Accomplishments:

- **Frontend Development:** Building responsive and interactive user interfaces using HTML, CSS, JavaScript, TypeScript, React, and Next.js.
- **Component Design:** Creating reusable and modular UI components using TailwindCSS and React component architecture.
- **Performance & SEO Optimization:** Improving loading speed, Core Web Vitals, and search visibility using Next.js SSR, image optimization, SEO metadata, structured data, and optimized data handling.
- **Content & Data Management:** Managing a structured recipe database using JSON, including ingredients, cooking steps, nutrition, FAQs, tips, SEO data, and internal linking.
- **Responsive Design:** Developing mobile-first and responsive layouts optimized for desktop, tablet, and mobile devices.

-
- **AI Integration: Integrating an AI-powered recipe chatbot to help users search, discover, and interact with recipe content.**
 - **Monetization: Integrating Google AdSense with responsive advertising placements while maintaining a smooth user experience.**

Technologies and Methodologies Used:

· HTML, CSS, JavaScript, TypeScript, React, Next.js, TailwindCSS, JSON, Next.js SSR, Next.js Image Optimization, React Components, SEO, Schema.org Structured Data, Google AdSense, AI Integration, Git, GitHub

Etisalat Egypt (e &)

Front-end Developer, 2024 - 2026

Projects:

- **Customer Self-Service Portal:** A web platform that allows customers to manage their mobile and internet services online, including viewing usage, paying bills, subscribing to packages, and submitting support requests. Focused on delivering fast, reliable, and user-friendly experience for millions of users.
- **eShop (Telecom Products & Services Platform):** An online store for purchasing SIM cards, devices, routers, and subscribing to telecom plans. Designed to provide a smooth digital purchasing journey with clear UI, responsive design, and optimized performance.

Responsibilities and Key Accomplishments:

- **Frontend Development:** Building responsive and interactive user interfaces using HTML, CSS, JavaScript, and React.
- **Component Design:** Creating reusable and consistent UI components using Chakra UI and TailwindCSS.
- **Performance Optimization:** Improving loading speed and SEO using Next.js features such as Server-Side Rendering (SSR) and optimizing data fetching with React Query.
- **Scalable Architecture:** Writing maintainable and scalable code using TypeScript and modular component structure.

Technologies and Methodologies Used:

- HTML, CSS, JavaScript, TypeScript, React, Next.js, React Query, React-date-range, Chakra UI, TailwindCSS, Prisma Client

Media

Front-end Developer, 2022 - 2024

Project:

- **Cloud Hosting:** is an advanced platform designed to provide users with a seamless experience in deploying, managing, and scaling their applications within the cloud. It supports various cloud infrastructure services, providing flexibility and control to users ranging from startups to large enterprises. Add an article and comment on the article.
- **New Look:** is a web application designed for a beauty salon catering exclusively to women. The platform provides users with an intuitive and elegant interface to book appointments, view services, and manage their profiles. The primary goal is to offer a seamless user experience while showcasing the salon's offerings in a visually appealing manner

Responsibilities and Key Accomplishments:

- **Frontend Development:** Implements user interfaces using HTML, CSS, and React.

- **Component Design:** Utilizes Chakra UI and TailwindCSS for consistent and modern component styling.
- **Performance Optimization:** Enhances load times and performance with server-side rendering in Next.js and efficient data handling with React Query.
- **Scalable Design:** Ensures maintainable and scalable code with TypeScript and modular components using Chakra UI and TailwindCSS.

Technologies and methodologies used:

- Html, Css, JavaScript, TypeScript, React query, React-date-range, Chakra ui, Next.js, Prisma client, Tailwindcss.

Tech Touch

Front-end Developer, 2022 – 2023 (Part Time)

Project:

- **Sheepy Web App:** the premier online marketplace dedicated to the buying and selling of sheep. Whether you're a farmer looking to expand your flock, a breeder wanting to reach a wider audience, or someone interested in starting a sheep farming business, Sheepy Web App offers the perfect platform for all your needs.

Responsibilities and Key Accomplishments:

- Added features to show sheep listings with details like breed, age, and price
- Built options for different delivery methods and pricing using Next.js And Prisma CLIENT, PostgreSQL, collaborating with diverse teams to enhance

Technologies and methodologies used:

- Next.js, Prisma, PostgreSQL, API, Typescript, JavaScript, ZOD, NEXT /Server, REACT-ICONS, JWT, Bean Validator, TAILWINDCSS.

Freelancers

Front-end Developer, 2020 - Present

Project:

- **ToDo List:** A task management application that helps users organize their daily tasks, set priorities and track progress.
- **Airbnb** A platform similar to Airbnb where users can book rooms at a hotel. Includes features to search for available rooms, book and manage reservations. This was created in Course.
- **Car Shopping:** An e-commerce site for buying and selling cars. Offers features such as car listings, detailed descriptions, user reviews and a secure payment system.
- **Rahman Garden:** A web application that showcases the garden's features, amenities and services. May include event booking options, a garden gallery and information about plant species. Also for booking workers to prepare vacant land for a garden.
- Many projects have been designed as Front-end and part of Backend and Prisma CLIENT on freelancers

Technologies and methodologies used:

- HTML, CSS, JavaScript, JQuery, REDUX, REACT QUERY, TAILWINDCSS, API, Prisma CLIENT, Typescript, SASS & SCSS, Bootstrap.
